# KYLIAN RENAULT

Madam, Sir,

As a French student in the 3rd year of computer engineering at CESI in Caen after successfully completing my two years of integrated preparatory classes, I would like to offer you my application as an intern for 17 weeks from August 28th to December 22nd as part of the international mobility program.

I already have a very good command of web languages as well as Laravel (PHP) and Vue JS (JavaScript) Frameworks that I learned during my previous internship and that I used to create my web application which you can find at the following address: Lahyra.com or on my GitHub (<https://github.com/Gammelinne>). I also master Unit Tests with PHP Unit as well as Mockery and Websockets that I use in my personal projects. Finally, I master the Linux environment as well as essential enterprise tools such as VS, VSC, GIT, Docker or Azure DevOps.

Regarding my personality, I am sociable, respectable and assiduous, whether in class, sports (judo practice for 11 years and brown belt), music (drum practice for 12 years and member of a pop/rock band) or during my previous professional experiences that I would like to share with your team. In addition, I am diligent and attentive to the slightest advice or remarks and our school, through the PBL method (problem-based learning), has taught me autonomy and searching by myself as well as group work which are two essential qualities for my perfect integration within your team.

Please review my attached application for additional details regarding my expertise and achievements. Do not hesitate to reach out if you have any questions or need further clarification on my experience. I would love to meet with you and discuss this position in detail.

Thank you for your consideration.

Sincerely,

RENAULT Kylian.
